#### Notes

\*Michal Kaminski was disconnected from the game just before crossing the finishing line. This was due to another person, known to the rider, accidentally logging into his account on another device. Consistent with accidents in the final moments of an IRL cycling stage race, he has been awarded a position and points equal to having finished last in the group of riders that he was with at the time of the incident. Therefore for the Wahoo Overall competition he has provisionally been awarded 65 Points consistent with finishing in 36th place. No other riders have had their finishing points or position impacted.
